Backend engineer with more than 10 years in software, mostly working with Node.js and TypeScript. My recent work includes digital-asset custody, high-volume energy data, real-estate search, and payment flows. I enjoy joining established teams, understanding how their systems really behave, and improving them without disrupting delivery.

45→12m RWE EXPORT PIPELINE

65% API RESPONSE IMPROVEMENT

Recent system record

PRODUCTION WORK · NEWEST FIRST

Sep 2025
– Jun 2026

○

Bitpanda

Senior Backend Developer

- Worked on backend services for an institutional digital-asset custody platform used by banks. The stack included Fastify, GraphQL, TypeScript, and AWS serverless services.
- Took ownership of the crypto address-book backend, from customer-address management to validation and production delivery.
- Improved service authentication and introduced a practical backend testing approach that the team continued to use.

AT

Aug 2024
– Jun 2025

○

ImmoScout24

Full Stack Developer

- Worked in the search and listing area of a large real-estate platform, shipping changes across React and Node.js.
- Integrated Iterable and delivered product changes where SEO and release quality both mattered.
- Contributed inside a mature AWS and MongoDB environment with strong testing and review practices.

AT

Sep 2022
– Jul 2024

○

RWE

Full Stack Developer

- Helped move parts of an energy-market data platform from Java to tested NestJS services.
- Profiled MongoDB queries used more than 15,000 times a day and reduced API response times by 65%.
- Added E2E coverage and moved CPU-heavy exports into Node.js worker pools. Export time dropped from 45 to 12 minutes without blocking regular API work.

DE

Earlier system record

Sep 2019 – Jul 2021	○ Endava Full Stack Developer – Built a Node.js, AWS S3, and Lambda document pipeline processing 2,000+ scientific papers daily. – Delivered React submission and tracking flows for large document collections and collaborative workflows. – Mentored two junior developers and shipped TypeScript checkout support for Klarna and card payments. RO
Jul 2018 – Sep 2019	○ WIP Romania Full Stack Developer – Built a MeteorJS and React mobile wallet with deposits, withdrawals, balance updates, and transaction history. – Used WebSockets and reliable client state to keep concurrent account activity responsive during peak usage. RO
Oct 2013 – Mar 2015	○ DeverSoft Web Developer – Developed a restaurant-management frontend with JavaScript, Java integration, and real-time WebSocket updates. – Improved everyday order, table, kitchen, and service workflows for restaurant staff. RO

Engineering capability

BACKEND	Node.js, TypeScript, Fastify, NestJS, GraphQL, REST APIs, microservices, distributed systems
DATA	MongoDB, PostgreSQL, MySQL, Redis, query profiling
CLOUD	AWS, Lambda, serverless, Azure, Docker, CI/CD, GitHub Actions
QUALITY	Integration testing, E2E testing, TDD, code review, production safety
PERFORMANCE	Node profiling, API profiling, Worker Threads, Worker Pools, export pipelines, API latency
FRONTEND	React, Redux, Tailwind, SEO-sensitive UI delivery
DOMAIN	Digital-asset custody, Crypto-address management, Crypto-address validation

EDUCATION	BS in Computer Science, 2017 Babeş-Bolyai University · Cluj-Napoca
LANGUAGES	Romanian · Native English · C1 fluent
AVAILABILITY	Long-term B2B contract · Remote from Romania · EU citizen · Available immediately
