Senior backend engineer with around 7 years of commercial Node.js and over 5 years of TypeScript across regulated fintech and data-heavy products. Most recently, I owned the crypto address-book backend for Bitpanda's bank-facing digital-asset custody platform, from API and data-model design through validation, testing, third-party integrations, and AWS production delivery. Additional work includes TypeScript payment and wallet flows, event-driven integrations, tested Java-to-NestJS microservice migration, and performance optimization for high-volume services.

Recent system record

PRODUCTION WORK · NEWEST FIRST

Sep 2025
- Jun 2026

○

Bitpanda

Senior Backend Developer

- Built backend services for an institutional digital-asset custody platform used by banks with Fastify, GraphQL, TypeScript, and AWS serverless.
- Owned the crypto address-book backend from API and data-model design through validation, tests, and production delivery.
- Strengthened service authentication and introduced backend testing patterns adopted by the team.

○

ImmoScout24

Full Stack Developer

- Integrated Iterable marketing automation into React and Node.js product flows for targeted lifecycle messaging, within SEO, test-coverage, and release constraints.
- Shipped search, listing, and SEO improvements across React and Node.js in a mature AWS and MongoDB real-estate platform.
- Matched the platform's review and production-safety standards while contributing inside an established distributed system.

○

RWE

Full Stack Developer

- Migrated legacy Java components incrementally to tested NestJS microservices for an energy-market data platform.
- Added integration and E2E coverage to protect behavior and reduce regression risk while replacing legacy paths.
- Profiled MongoDB aggregations handling 15,000+ daily queries and reduced API response times by 65%.
- Moved CPU-heavy exports into Node.js Worker Pools, cutting runtime from 45 to 12 minutes while keeping normal API work responsive.

DE

Earlier system record

Aug 2021 – Aug 2022	Independent Projects & Professional Development Worked on independent software projects and professional development before returning to long-term product work at RWE.	RO
Sep 2019 – Jul 2021	Endava Full Stack Developer - Built a Node.js, AWS S3, and Lambda document pipeline processing 2,000+ scientific papers daily. - Delivered React submission and tracking flows for large document collections and collaborative workflows. - Mentored two junior developers and shipped TypeScript checkout support for Klarna and card payments.	RO
Jul 2018 – Sep 2019	WIP Romania Full Stack Developer - Built a MeteorJS and React mobile wallet with deposits, withdrawals, balance updates, and transaction history. - Used WebSockets and reliable client state to keep concurrent account activity responsive during peak usage.	RO
Oct 2013 – Mar 2015	DeverSoft Web Developer - Developed a restaurant-management frontend with JavaScript, Java integration, and real-time WebSocket updates. - Improved everyday order, table, kitchen, and service workflows for restaurant staff.	RO

Engineering capability

BACKEND	Node.js, TypeScript, Fastify, NestJS, GraphQL, REST APIs, microservices, distributed systems, event-driven systems, async workflows
DATA	MongoDB, PostgreSQL, MySQL, Redis, query profiling
CLOUD	AWS, Lambda, serverless, Azure, Docker, CI/CD, GitHub Actions
QUALITY	Integration testing, E2E testing, TDD, code review, production safety, migration regression safety
PERFORMANCE	Node profiling, API profiling, Worker Threads, Worker Pools, export pipelines, API latency
PRODUCT INTEGRATIONS	Iterable, marketing automation, third-party integrations, React, Redux, SEO-sensitive UI delivery
DOMAIN	Digital-asset custody, Crypto-address management, Crypto-address validation

EDUCATION	BS in Computer Science, 2017 Babeş-Bolyai University · Cluj-Napoca
